

# Synergy Plus

## Professional

Designed specifically to provide a full hardware RAID protection storage for the Avid Unity environment, Synergy Plus is the high availability storage solution for Avid Unity. The storage is transparent to the Unity environment. All functions and workflows are the same. Built upon Archion's Synergy RAID system it provides the same hardware RAID security, and high bandwidth FC performance that has been the core of Archion's installations worldwide. It is Synergy Plus Hardware RAID ability replaces the Unity mirroring for storage protection. All the storage on the unit is available for media.

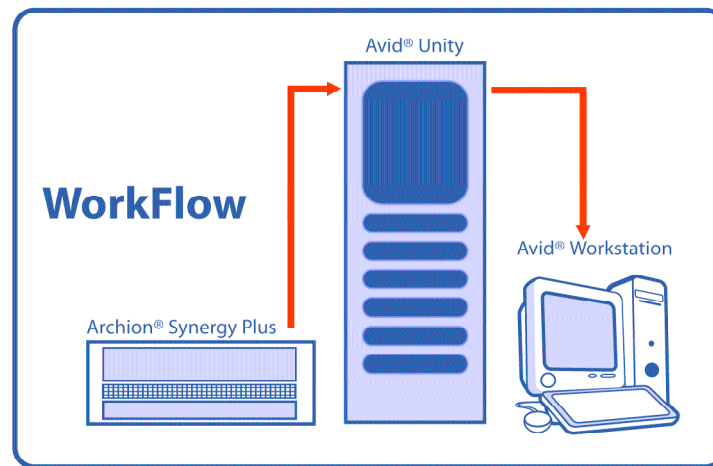

## Performance & Protection

Think of it as a highly advanced replacement for Avid's MediarrayZX storage. It works in HD and SD environments with two load balanced ports of FC for the most demanding bandwidth applications. Each unit is self contained with all functions in firmware for high reliability. Power supplies, fans, and hot spare drives add to a consummate level of reliability and performance. All the protection is built in, not dependant.

## The Bottom Line

Synergy Plus is the only RAID storage solution for Avid Unity. With its hardware RAID protection you get double the storage with all the protection as well as full Unity compatibility. All at price that cannot be beat.

## Features

- *Hardware RAID protection eliminates need to mirror storage. All of the Synergy plus's storage is available.*
- *Large storage capacity of 4, 6.4, and 8TB are the building blocks of large Unity systems with double the protected storage of a standard system.*
- *Levels of redundancy that are self contained and not dependant on software and OS's that ensures complete peace of mind.*
- *Two FC storage ports for multiple switch operation as well as single switch load balancing gives dramatic increase in bandwidth.*
- *Automatic rebuild of drives and hot swap ability makes servicing in case of a failure easy and with little or no downtime.*
- *Physical drive management is handled by Synergy Plus thus eliminating Unity's downtime due to complicated drive management.*
- *Dramatically less expensive than any other storage for Unity.*
